evaded a direct reply. It is whispered that one of his fellow-commissioners, Mr. Kasson, may get the St. Petersburg portfolio.

A new athletic club is about to be established in Brooklyn. This, of itself, is not exactly sensational news, but is interesting as illustrating the tendency of the times. The gentlemen who intend inaugurating this Club are business men. They have struck a key-note towards success in business by aiming at being successes physically. The work of securing suitable grounds and making preparations for organization on a firm, busiess-like and satisfactory basis is being vigorously pushed. Lawn tennis and 'cycling are to be especially favored, though general outdoor athletics are to be by no means slighted. It is probable the grounds will be located at Dean street and Kingston avenue. Here is another chance for Steve Brodie to distinguish himself. Mark Braden, the swimmer of the west side, has challenged any man to swim to Weehawken from the foot of West Twenty-third street.

Brodie goes to New Orleans to give what he calls a "fireworks" exhibition in the Mississippi River July 7. He sets off fire-works while encased in his rubber suit.

Weekly handicap meetings will be given by the American Athletic Club, commencing early in August. Suitable prizes will be awarded for each event. The three men making the larger number of points by the end of the season will receive handsome gold, silver and bronze medals.

How Did Mrs. Kitty Emmons Get That Wound in Her Head?

The Police Report Attempted Suicide, but Others Say Accident.

She May Have Fallen Off a Washtub and Not Been Shot at All.

Mrs. Kitty Emmons, lay in a cot in Bellevue Hospital, this morning, where she had been taken after being arrested last night on a charge of attempting suicide, by shooting herself in the temple.

The circumstances surrounding the case are very peculiar, and the whole affair is surrounded by an air of mystery. The main facts, as gathered by the police of the Thirty-fifth street station, are clearly set

forth in the following statement sent to Supt.

Murray this morning by Capt. Ryan: William Murray, Sept.

At 10:35 F. M., June 25, 1889, Roundsman Thomas Cassidy, of my command, arrested Ritty Emmons, thirty-seight years old, married, of 204 East Thirty-second street, on the charge of attempted smicide, on the complaint of Dr. Sylvester, of 206 East Thirty-second street, who came to this station and stated that at 0,30 g. M. he was called in by Ella Hammond, of 204 East Thirty-second street, to attend Mrs. Emmons, who was suffering from a severe wound over the right eye, which shereceived from shooting hericalf. The doctor was unable to find any bulled, or to say how seriously she was injured. She was taken to Bellevue Hospital. Respectfully, Tiomas Ryan, Captain Twenty-first Precinct. June 26, 1889. William Murray, Supt.:

From an investigation by an Eventno World reporter it would appear that Mrs. Emmons received her injuries accidentally, although the people living in the house tell stories that are somewhat contradictory.

To the police last night the injured woman said that she had shot herself, and subsequently she said that she had been shot through the window.

An Evening World reporter visited the

house this morning. Mr. Emmons, her husband, when seen, said that he was not at home when his wife net with the a-cident, but he understood that she had fallen over and struck her right temple on the corner of the stone.

Mrs. Hammond, who lives on the floor be-low, denied that Mrs. Emmons shot herself, but says that she received her injuries ac-

cidentally.

About 1 o'clook yesterday afternoon."

said Mrs. Hammond, "I heard a noise upstairs that sounded like the fall of a chair. I went upstairs and found her bleeding. It didn't amount to much until early in the evening, when blood began to bow from the wound, and I called Dr. Sylvester in to at-

tend her.

"It is nonsense to say that she attempted suicide. No pistol was found, and neither has any bullet been discovered," concluded Mrs. Hammond.

Mrs. Emmons was found in Bellevue Hospital with her head tied up in bandages. She is a large woman, with a florid complex-ion, and about thirty years of age. When questioned about how she received

When questioned about how she received her injuries she said:

"I had just washed the dishes yesterday, and was putting them away in the closet when I fell.

"The shelf was too high for me to reach, and I had to stand on the corner of the kitchen wash-tubs.

"In getting down I slipped and fell, and in my descent I struck against the corner of the tribs and received a gash over the even." ettes."
"'Gad! I wish some of my welatives would expiah, Dashed if I don't try it."

"Why did you say last night that you had tried to kill yourself by shooting?" asked the

tried to kill yourself by shooting?" asked the reporter.

"Well, you know I'm a Yankee and like to joke, and what I said was only in fun and not meant seriously," she answered.

Her husband, who is a machinist, visited Bellevue this morning. He had another theory as to how his wife had got hurt.

"She has been suffering from spine trouble for some time," said be, "and has been in the habit of using morphine. I think that she must have been under the influence of the drug when she fell," he concluded.

The physicians who have charge of the woman think that she will be able to go to court this afternoon or to-morrow.

woman think that she will be able to go to court this afternoon or to-morrow.

"I didn't think the woman was shot," said one of them this morning, "and am quite certain that she didn't shoot herself.

"The attending physician was mistaken in thinking she had been shot, but his mistake was quite natural, as the wound looked like one that had been made by a bullet at a short distance. "We were unable to find any bullet, how

"We were unable to find any bullet, how-ever, and there were no burns or powder-merks near the wound such as sne would have it she had shot herself."

Capt. Ryan has completed his investigation and he now inclines to the opinion that Mrs, Emmops's injuries were received from a fall.

As soon as she is able to leave the hospital, however, she will be arraigned in court.

The only basis for such a supposition up to to-day was the finding of some old bills of lading among the wreckage bearing the name of the Victoria.

The agents of the Anchor line in this city, who claimed that it could not possibly be their vessel which had been wrecked, said that they were probably in an old deak which the purser had thrown overboard.

one of the vessels wrecked. It is very strong evidence of a disaster."

There must have been another vessel wrecked at the same time, and the supposition is that it is a steamer which may have had passengers abour!

Ingandescent lamps of an English pattern such as are used in steamers were found on the sands. No incandescent lamps were used aboard the Victoria, which was only a freight

steamer.

Philadelphian (astonished)—Well, why don't you go to the store and inquire? Most likely he is there yet. A dispatch from Quebec this morning states that the steamer Victoria is at Isle Ver.e, and that she will probably be a total wreck. This

is a mistake.

The vessel ashore at Isle Verte, which is in the St. Lawrence River about 150 teet from its mouth, is the Victory, and not the Vic-toria, and is a local river steamer on the St.

Lawrence.

She went ashore there yesterday. It would have been impossible for the Victoria, of the Anchor line, to have reached the St. Lawrence at all without completely doubling up on her course. At the office of Henderson Brothers it is still believed that the Victoria is safe.

THE ROYAL YACHT SQUADRON PREVENTS

AN INTERNATIONAL RACE.

Tardy Decision to Reject the New Deed of Gift-American Yachtsmen Not Sur-prised-They Interpret It as Meaning that the Englishmen Had No Hope of Valkyrie's Winning This Year.

The Royal Yacht Squadron has met in London, and effectually squelched all prospects of an International yacht race this Fall, by adopting a resolution declaring that they cannot accept the new deed of gift of the America cup.

This action on the part of the Royal Yacht Squadron is looked upon as a queer one, to This sudden determination, coupled with the apparent lack of courtesy which the

prised and disgusted everbody here.

Letters were sent to the Royal Yacht Squadron over a month ago, but no answer has been received from them. When letters have been received here they have always

have been received here they have always been promptly answered.

The action of the Squadron yesterday appears to be of a very flimay texture.

The challenge was issued and accepted with the full knowledge of the terms of the deed.

The Puritan-Genesta, Mayflower-Galatea and Volunteer-Thistle races were all sailed under the new deed of gift, and no excuse, it would seem, could be put forward on the ground of ignorance.

Can it be that Lord Dunraven is afraid to sail against the Volunteer? yachtsmen ask. And they argue that it is just probable that he believes that certain and crushing defeat

And they argue that it is just probable that he believes that certain and crushing defeat awaits him when his Valkyrie is hauled alongside the saucy clipper from Boston. In rejecting the new deed of gift, or rather refusing to race under its terms should the Valkyrie be lucky and win, it would seem that it was the intention of the Royal Yacht Squadron to effectually settle all chances of our ever regaining the cup. It is only a case of crawl, and a bad one at that.

our ever regaining the cup. It is only a case of crawl, and a bad one at that.

The Valkyric has not shown up in extra fine style against other English cutters, and it is probably this that has influenced the

Squadron in its action.

There is not much disappointment over this announcement, for all along it was felt that the Valkyrie would not race for the America cup.

It was probably thought on the other side

It was probably thought on the other side that one of our seventy-footers would be pitted against the visitor, and it will be remembered that a great noise was made about the Valkyrie just being able to get into a seventy-foot class.

New York Yacht Club men are determined that not the slightest modification shall be made in the new deed, no matter what the objection should be. They have already conceded everything but the race and have deait very fairly and squarely.

However, the Valkyrie will visit these waters to race for the cup which Gen. Paine has promised to provide, and yachtamen here will have a chance to see her sailing qualities anyhow.

anyhow.

Until further and more definite news is received it will be impossible to state what the
real objection amounts to.
